1.In CRM Toolbar Change Page name to CRM Links and Url

2. Action Button is perfect. Remove column Website Link from users view. User is already getting blue VIEW button to open the link so website link field is not needed.

3.Purple Button of New CRM Tool needs to be changed to New CRM Link.

4.Also Make the ID and password field non mandatory as there are projects where customer registration does not require Id and passowrd

5.When clicking on CRM links and URL on the first page top left CRM Toolbar also needs to be Changed to CRM Links and URL
